OBJECTIVE

Detail-oriented Full-Stack Developer and IT student with a strong foundation in the Laravel ecosystem. Experienced in building scalable CRUD applications and improving user interactivity through modern web technologies. Eager to apply my technical skills in database management and system integration at IBM Philippines.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6), SQL, HTML5, CSS3

Frameworks & Tools: Laravel, MySQL, AJAX, Bootstrap, Git, XAMPP, VS Code

Core Competencies: Full-Stack Web Development, Database Management, System Troubleshooting, Multi-role Platform Architecture

KEY PROJECTS

Gym Membership System

Laravel, MySQL, AJAX

- Engineered a comprehensive membership platform featuring automated billing and member tracking for a digital fitness environment.
- Implemented a secure administrative dashboard to manage trainer assignments, member records, and subscription tiers.
- Integrated AJAX for real-time status updates and dynamic content loading, significantly enhancing the user experience.
- Designed a relational database schema to ensure data integrity for member transactions and attendance logs.

EDUCATION

Bachelor of Science in Information Technology

[Your University Name] | Expected Graduation: May 2026

RELEVANT COURSEWORK

- Global Professional Practice (GPP 101)
- Advanced Web Development
- Database Management Systems
- System Analysis and Design

RE: Application for Junior Software Developer / Associate Developer

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Junior Software Developer position at IBM Philippines. As a graduating Information Technology student, I have spent my academic career building functional, real-world applications that solve complex problems—a passion for technology that I am eager to bring to the IBM team.

My technical background is rooted in the Laravel ecosystem. My most significant project is a **Gym Membership System**, where I engineered a multi-role platform that handles everything from registration to subscription management. I successfully implemented AJAX for real-time tracking, ensuring a seamless user experience for both administrators and members.

I am drawn to IBM because of its global reputation for excellence in cloud computing and its "Growth Mindset" culture. I pride myself on being a persistent problem-solver. Whether it is troubleshooting database errors or refining CRUD logic, I enjoy the challenge of building robust software that makes a tangible impact.

I am confident that my hands-on experience with database management and modern web technologies, combined with my commitment to continuous learning, makes me a strong fit for the Associate Developer role.

Thank you for your time and consideration. I look forward to the possibility of discussing how my skills and background can contribute to IBM's mission of innovation.

Sincerely,

RAVEN KYLE S. NITURADA
